ring-ring passive PCB; instance 9/3%; local references in manifest

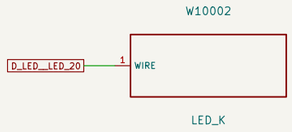

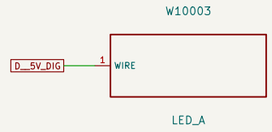

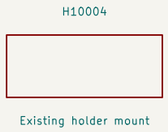

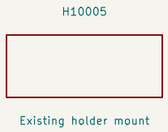

quantize: vertical_top passive PCB; instance 10/34; local references in manifest

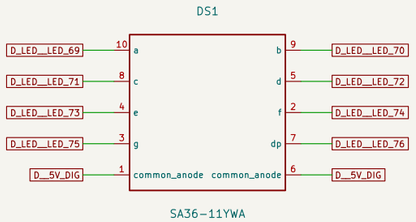

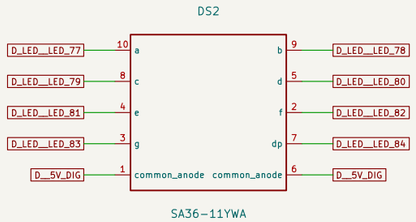

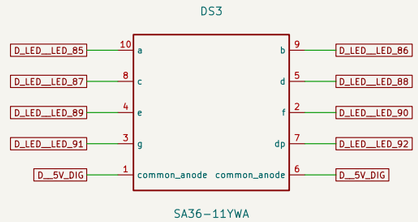

Three directly wired common-anode display digits; manufacturer pin numbers

10k pots; terminal2 wiper; detent allocation and exact procurement suffix unresolved

RV1

10k linear — detent TBD

RV2

10k linear — detent TBD

RV3

10k linear — detent TBD

RV4

10k linear — detent TBD

RV5

10k linear — detent TBD

RV6

10k linear — detent TBD

RV7

10k linear — detent TBD

RV8

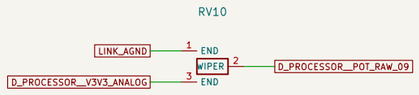

10k linear — detent TBD

RV9

10k linear — detent TBD

RV10

10k linear — detent TBD

Momentary contacts:1-2 and3-4 internally common; press bridges pairs: wire1 and3 only

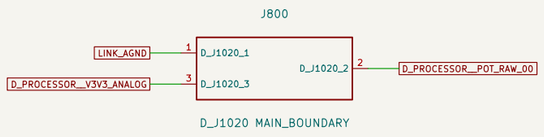

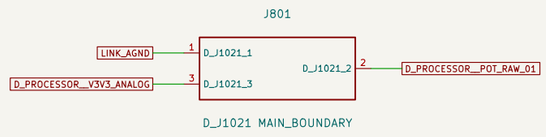

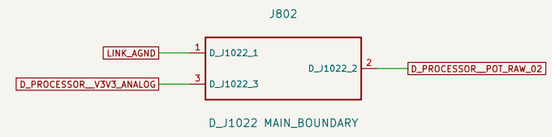

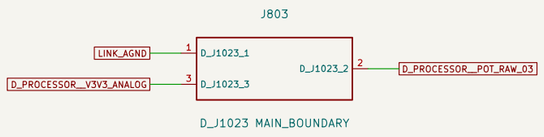

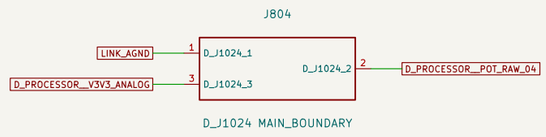

Source-bound main-board header pins; boundary symbols are not additional physical connectors
